 Nonresponsive

Hi Allison,

You did not space out. I just set up the meeting. When are you free tomorrow? We were debating whether to hold the call with ODEQ (b) (6) and then I heard last week that ODEQ selected an acting (b) (6). Unfortunately Greg, who is acting, can only stay 30 minutes so I wanted to include the most important and controversial stuff first.

Do you think Forestry will just be an update? I thought there might be some discussion on the approach especially since it is unlikely that the TMDLs will be issued and approved by EPA by the date in the settlement agreement--possibly a discussion on how much must be accomplished (public noticed? sediment and temperature parameters), along with white paper to possibly meet the condition....I thought that New Development and OSDS would be just short updates and did not require much discussion. How much time should we give each?

Cheers,

Jayne

Thanks for sending around the agenda Jayne. Did we have a planning meeting scheduled for Thurs that I forgot to include on my calendar? I have a conflicting meeting at that time so apologize if I spaced and forgot to carve out time for our pre-meeting call. The agenda looks good and I'm happy to go over settlement timelines. My main comment is that time looks pretty tight and doesn't save a lot for discussion. Is there a way to cut down the forestry piece a bit since it will primarily

be an update too so allow a little extra time for some of the other sections?
